

# VENTUS

The development of the new TSP Ventus series posed a great challenge to our Japanese TSP material experts, the numerous scientists involved and all the test players worldwide: The goal was to design state-of-the-art offensive rubbers with an excellent cost/performance ratio and highly balanced playing features for any type of playing style. The result: Ventus Speed, Ventus Spin and Ventus Soft. In endless test series, the rubbers were put through their paces in order to optimize the rotation development and control properties of the rubbers. ORC stands for Optimized Rotation Concept. This new rubber technology was developed and perfected exclusively for the Ventus series. Your advantage: More rotation and control by a longer ball contact time thanks to the new made-for-spin top rubber sheet and the softer sponge design.

**ORC**  
**Optimized Rotation  
Concept**

## ORC

The TSP Ventus series features the innovative "Optimized Rotation Concept" rubber technology. This technology with a new, open-pore sponge design, guarantees longer ball contact which results in significantly more rotational energy transfer on the ball. In addition, the "Optimized Rotation Concept" enables a higher ball trajectory and provides for fantastic control in your play in addition to dangerous spin variants!

**JAPAN GERMANY  
COMBINATION**

## JG COMBI

German innovation spirit meets Japanese precision! With the Ventus rubber series, TSP has taken rubber development to the next level. The TSP Ventus series is the result of "Japan Germany Combination", i.e. a close cooperation of Japanese product developers and German designers, combining many decades of experience in rubber design with state-of-the-art production methods.

## VENTUS SPEED

EUR 36,90

Ventus Speed is the hardest and fastest variant of the TSP Ventus series. When designing this offensive rubber, the Japanese rubber experts focused on perfect balance between high speed, maximum spin development and great control. The open-pore 45° sponge of Ventus Speed features the new "Optimized Rotation Concept" and is truly made for spin. Thanks the new sponge design, this new TSP development guarantees longer ball contact which results in more rotational energy transfer on the ball. In addition, the higher trajectory resulting from the "Optimized Rotation Concept" provides for great feel and more control in your play. The fast performance top rubber sheet of Ventus Speed develops tons of power and tremendous drive both for aggressive opening loops and mid-distance topspin attacks. Ventus Speed is a highly balanced offensive rubber offering great value for money.

sponge thickness: 1,8 | 2,0 | max  
speed: 109 | control: 93 | spin: 104

## VENTUS SPIN EUR 36,90

With its open-pore medium sponge, Ventus Spin is the “golden mean” of the TSP Ventus series. Powerful mid-distance topspin attacks, dangerous spin loops or controlled close-to-the-table blocking – Ventus Spin from TSP is a real multi-talent among offensive rubbers with well-balanced playing features. The new 40° sponge of Ventus Spin featuring the “Optimized Rotation Concept” provides for a longer ball contact time, and enables you to put your opponent under real pressure with dangerous spin variations and excellent control in blocking. Ventus Spin is a fun-to-play, high-precision offensive rubber offering great value for money and unlimited room for creativity. Plus, it guarantees excellent control in all situations right from the start, which makes it the ideal choice for players with little time for training.

sponge thickness: 1,8 | 2,0 | max  
speed: 105 | control: 95 | spin: 105

## VENTUS SOFT

EUR 36,90

Ventus Soft is an ultra-soft, high-precision and fun-to-play offensive rubber offering excellent control. When designing Ventus Soft, the TSP rubber experts relied on the "Optimized Rotation Concept" and developed one of the softest and most controllable sponges in the offensive segment. Thanks to the super-elastic, open-pore 35° sponge of Ventus Soft, the ball virtually digs into the rubber for extraordinary spin variations. Plus, Ventus Soft features excellent sound and great catapult effect for optimum control even in the most difficult situations. Thanks to the fast top rubber sheet, powerful smashes or topspin bombs also come very easy.

sponge thickness: 1,8 | 2,0 | max  
speed: 101 | control: 97 | spin: 106
